DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 recites the limitation "said electrodes" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 9 recites the limitation "said polymer layer" in line 1 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 1-7, 10-14 are allowed.

Claims 8 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 14, there is no prior art of record that teaches a subwavelength optical filter comprising a planarized grating layer in addition to the features of claim 1. Friesem et. al US Patent 5598300, teaches a tunable optical filter comprising, a subwavelength resonant grating filter comprising a subwavelength grating having a plurality of diffraction elements (see fig. 4 element 224)), and a planar waveguide layer adjacent (fig. 4 element 222) and substantially parallel to said subwavelength grating, a liquid crystal cell substantially filled with a liquid crystal material (fig. 4 element 226),

Art Unit: 2871

said liquid crystal cell comprising a first and second surface wall and a means to control the refractive index of said liquid crystal material (fig. 4 element Vk), thereby tuning the filter. However Friesem does not teach the grating layer being planarized as the liquid crystal fills the gaps between the gratings rather than total separation between the liquid crystal cell and the grating layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US Patent 6,552,842, US Patent 6,661,952, US Patent 5,299,289, US Patent 6,118,586.
